

Exchange Email Migration California Pizza Kitchen

Background

Communication within our organization and between the rest of the world is the key to success for any business. Surpassing telephone, letters, and any other media, email has become the standard for official matters of any institutions or organizations. That is the reason that we should prioritize the functionality of mail in our workplace.

83%

**OF ORGANIZATIONS OPERATE
THEIR EXCHANGE IN THE CLOUD**

Source: Web Tribunal, Cloud Adoption Statistics for 2022

Many organizations that started using new technologies in the early 2000s, choose to use an on-premise email management. This type of email hosting relies on a high investment on their installation at location, IT departments, and constant support. However, in 2020, 83% of organizations began operating their exchange needs in the cloud, according to the Web Tribunal.

Benefits

There are many benefits of this solution, such as simultaneous and effective adaptation. Here we present some the most remarkable:

Upgraded
efficiency

Expert
support

Cost
effective

More centralized and easier to manage

- Shared calendar and mailboxes
- Accessible for everyone, everywhere
- Comes with Office 365 Enterprise subscription
- Mailbox administration
- Seamless transition, without any interruption on operations

Objective

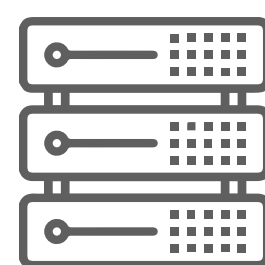

California Pizza Kitchen needed an email solution that would provide efficiency, constant expert support, and most important: to be cost-effective. Team Venti offered the perfect fix for them: an email migration from on-premise to an Exchange service in the Cloud through Microsoft 365.

Solution

Before starting any migration, it is important to determine whether full cloud or a hybrid environment is appropriate. It is essential to state this decision wisely. CPK elected a hybrid environment based on their existing infrastructure and Exchange management requirements which allowed them to enjoy the benefits of the cloud while still being able to leverage some in-house features.
