

Microsoft Intune Migration Case Study Mattel

Intune in action

Microsoft Intune is a cloud-based service that focuses on mobile device management (MDM) and mobile application management (MAM). You control how your organization's devices are used, including mobile phones, tablets, and laptops. You can also configure specific policies to control applications.

Benefits

- Cost reduction
- Strong security
- Higher performance

In 2022, working in the Cloud became an essential modality and incremented its users. Remote work established itself as the "new normal". At the moment, it is proving the opportunity for many operations to be achieved remotely. Adding up, practices such as BYOD (Bring Your Own Device) were implemented and showed many organizations the benefits they bring. Cost reduction, strong security in data, and higher performance among its collaborators are just a few to mention. Microsoft Intune became a commonly used tool to achieve these objectives.

Team Venti's Approach for Mattel

Microsoft Intune allowed Mattel's transition to flow fluently, safely, and with little to no business interruption. By administrating Windows 10 transitions and other migrations, Intune did not require a VPN during this process. As a result, a less invasive migration thanks to the use of specific controls and protection on Mattel's data. In addition, Intune may also assign, add, and administrate mobile apps (MAM Mobile Application Management) with specific settings according to your needs.

Mattel trusted Team Venti with their Intune Migration journey, allowing us to protect, secure and administrate (MDM, Mobile Device Management), without data loss on personal or company-owned devices.
